Title index

Analysis and design of information and communication structures in CIM 135
Applying simulation and expert systems to the control of advanced manufacturing facilities 71
Aspects of computer-aided fixture design 111
Beyond the deskilling controversy 38
Changing role of humans within an integrated automated guided vehicle system 115
CIM-OSA: architecture for enerprise integration - a report on current developments 47
Cluster analysis approach to batching in flexible manufacturing systems 79
Data manipulation for the integration of simulation with online production control 19
Development of graphical software for CIM applications 157
Effectiveness framework for supply chain management 196
FIRST: a Petri net-based system for simulation of complex distributed manufacturing systems 252
FMS simulation model using PC-SIMSCRIPT-II-5 150
Human-centred computer-integrated manufacturing 223
Integrated management of concurrent shopfloor operations 27
Knowledge-based tool for manufacturing systems design 163
Large scale computer simulation and systems design of computer-integrated manufacturing 100
NC technology: developmental paths in the USA and FRG 178
Non-arbitrary approach to routing in flexible manufacturing systems 5
RA-IQSE: system for online quality support for designers of machined parts ad products 246
Requirements analysis of production management software systems 207
Rule-based approach to just-in-time manufacturing 11
Scheduling of a multi-robot assembly cell 236
Software integration technologies in CIM 83
Towards an environment for the integration of analysis and design 216
Use of networks in describing the design to manufacturing process 171
Why 802.3 Ethernet LANs flourish in manufacturing operations 53
WIP cost-related effectiveness measure for the application of an IBE to simulation analysis 141
Work organization, integrated manufacturing, and CIM system design 230
